

Dear Sir or Madam:

I am writing to you to express my interest and motivation in completing a one-to-two month summer internship in your company during the year 2013. I'm confident that my strong academic background as an Engineer in Information Technology and Communications, Master in Information Systems, and a future Master in Information Technology for Business Intelligence (IT4BI), combined with my work experience and languages I speak, will fulfill your requirements.

I am a Mexican Engineer that worked in an International firm as the Quality External Consultant in an improvement project in 2010, in terms of developing and enhancement of business processes to solve some inconsistencies in the production line. Additionally I worked in another project as a Logistics Analyst finding and creating new business opportunities. In addition to my work experience, in the year 2009 I had the opportunity to study in a prestigious business university named EUROMED École de Management in France for 6 months and in 2010 I studied in Université LAVAL in Québec, Canada. By the end of June 2012, I completed my Masters' in Information System at Lund University in Sweden. Now, I am currently a first year Masters Student from the program Information Technologies for Business Intelligence (IT4BI) taking place in European Universities.

A summer internship will contribute positively to the evolution of my career and as an upgrade for my intellectual capital to develop my skills in the working environment. I am confident that I will be an active and useful member to your team, willing to contribute during my internship. I am therefore very excited in becoming an intern in your company and working on enhancing projects in an international environment.

I enclose my resume containing more details about additional information on my experience and skills. I would appreciate the opportunity to discuss my candidacy with you. I can be available for an interview any time at your convenience.

Thank you for your consideration and looking forward to hearing from you.

Yours Sincerely,

Stephany Garcia Martinez
Student – Master in Information Technology for Business Intelligence (IT4BI)
